=====

PROFESSIONAL SUMMARY

=====

Total Years of Experience: 15

Experienced Cloud Architect with

15+ years of experience building and scaling production

systems. Proficient in {top_skills}. Passionate about solving complex

technical challenges and delivering high-quality software solutions.

=====

EDUCATION

=====

Bachelor of Engineering in Computer Science

Lebanese American University (LAU)

GPA: 3.97/4.0 | Class of 2012

Relevant Coursework:

Data Structures & Algorithms, Software Engineering, Machine Learning, Computer Networks, Cybersecurity, Cloud Computing

=====

PROFESSIONAL EXPERIENCE

=====

Senior Backend Developer at BrightHire Technologies | 2023 - 2026

- Optimized system throughput by 361% through caching and async processing.

Senior ML Engineer at Beehive Systems | 2021 - 2023

- Drove MLOps adoption reducing model deployment time from weeks to hours.

Lead Software Engineer at PixelCraft Studios | 2019 - 2021

- Managed a team of 474 engineers, driving delivery of critical platform features.

Cloud Architect at DataPulse Inc. | 2010 - 2018

- Led cloud migration of 7 services from on-premises to cloud infrastructure.

=====

PROJECTS

=====

[1] Real-Time Analytics Dashboard

Technologies: Redis, PostgreSQL, Python, ClickHouse, React, Docker

Built a real-time analytics dashboard processing 10M+ events daily. Implemented sub-second query performance using materialized views and pre-aggregations.

[2] Cloud Cost Optimization Platform

Technologies: Go, Python, Terraform, Grafana, Prometheus, AWS

Developed an internal platform for cloud cost tracking, anomaly detection, and automated rightsizing. Saved \$2M annually in cloud infrastructure costs.

[3] AI-Powered Recommendation Engine

Technologies: Redis, PyTorch, Kubernetes, PostgreSQL, Python, TensorFlow

Built a real-time recommendation system using collaborative filtering and deep learning. Improved click-through rate by 35% and user engagement by 50%.

=====

TECHNICAL SKILLS

=====

Frontend: Angular

Backend: Flask, Express, FastAPI

Databases: MongoDB, Elasticsearch

AI/ML: NLP, PyTorch

DevOps: Git, Linux, Azure, CI/CD

Fundamentals: Agile
